Opening soon

Data and AI platform for large companies

Sector: Enterprise Software / Data Intelligence | Head office: San Francisco | Founded: 2013

LAST ROUND VALUE
$190B
Aug 2026, led by Coatue

REVENUE RUN-RATE
$7B+
Q2 2026, up about 80% a year

ABOUT

Databricks sells software that lets big companies store all their data in one place, analyse it and build AI tools on it. It was started in 2013 by the people who created Apache Spark at UC Berkeley. More than 20,000 organisations use it, including over 60% of the Fortune 500.

WHAT LOOKS GOOD

- Revenue run-rate passed $7 billion in Q2 2026, and growth sped up to about 80% a year.
- Free cash flow has been positive over the last 12 months.
- Net retention is over 140%: existing customers spend over 140% of what they did a year ago.

WHAT TO WATCH

- The last round valued it at about 27 times yearly revenue. Snowflake, its closest listed rival, trades at a lower multiple.
- No listing date has been announced.
- Competitors include Snowflake and the cloud providers Amazon, Google and Microsoft.

LATEST FUNDING ROUNDS

RISKS

- You could lose money. Private companies can fall in value, and late-stage rounds are priced for strong growth.
- Your money is locked in. There is no daily price and no guaranteed way to sell.
- The listing could take years, or never happen.
- Information is limited: private companies publish far less than listed ones.
