ABOUT

FluidStack is a cloud infrastructure company which offers high-performance GPU cloud computing to developers and enterprises. FluidStack's platform provides on-demand access to Nvidia GPUs, including A100 and H100, optimized for AI training and inference. The company aims to deliver scalable GPU solutions that may help businesses train large AI models efficiently, with the potential to reduce cloud computing costs by up to 70% compared to traditional providers.

RISKS

- You could lose money. Private companies can fall in value, and late-stage rounds are priced for strong growth.
- Your money is locked in. There is no daily price and no guaranteed way to sell.
- The listing could take years, or never happen.
- Information is limited: private companies publish far less than listed ones.
