ABOUT

Space Exploration Technologies ("SpaceX") was founded with a mission to design, manufacture, and launch rockets and spacecrafts with the ultimate goal of enabling people to live on other planets. Headquartered in Hawthorne, CA, the company was founded by Elon Musk in 2002.

RISKS

- You could lose money. Private companies can fall in value, and late-stage rounds are priced for strong growth.
- Your money is locked in. There is no daily price and no guaranteed way to sell.
- The listing could take years, or never happen.
- Information is limited: private companies publish far less than listed ones.
